

# StrutFoot

## Adjust & Turn

StrutFoot's new adjustable angled insert allows you to install on a pitched roof up to 10° allowing the framework to sit square. It has been developed so it can be used in both our R200, R305 & R500 plastic foot so it is universal with products already stocked by our suppliers.

It is made from galvanised steel making it suitable for roof applications. It is suitable for both 41x41mm channel and 40x40 box section.
